Equipment

Vehicle Description

This Texino Switchback II model is built on the Mercedes Sprinter 144" chassis and is a seat four and sleep four camper van that is loaded with premium features including Victron electronic components, diesel and electric heater and hot water system, Smartfloor, and a pop-up roof with bed. This van will keep you safe and comfortable on your next adventure whether you're off the grid or down at the beach.

Sleep four adults comfortably with two large beds - one murphy bed located at the back of the van (sleeping quarters extended by flarespace) and one bed accessible from the interior up a removable ladder in the pop-up roof. The murphy bed can be lowered electronically with a switch of a button to make room for larger items like bikes and cargo that can be loaded from the rear.

With 300 AH of battery power that can be charged by the second alternator or 320w of solar, you will be able to stay off the grid for an extended amount of time. Charge all your devices with a 3000w Victron inverter with three AC plugs throughout the van and be able to charge your van system with the 110v four pin shore power connector. Monitor your entire electronic system through the Victron GX Touch screen.

This van features an abundance of cabinet space and a full galley with an Isotherm full size fridge, hot and cold-water faucet, induction cooktop, and filtered drinking water faucet. Stay warm on cold nights with the Aquahot 125 diesel and electric system with two air heaters installed in the front and back of the van. Turn on the hot water heater to take a hot shower with custom privacy curtains at the rear of the van.

Smartfloor seats can be purchased with vehicle.

- SCA Pop Up Roof w/Bed
- Smartfloor Seats Available for rear area
- Aquahot 125D Diesel/Electric Water & Air Heater
