### Equipment

### Vehicle Description

Want to take the whole family camping and be able to seat up to four people? This 2020 Texino Switchback 2.0 camper van with the smartfloor seating system and with two sleeping areas, one in the rear murphy bed and then another in the pop-top, the whole family will be comfortable on your next trip. Built on the coveted Sprinter 144" 2wd chassis with the 3.0 liter V6 diesel engine, this van is ready for an adventure.

The floor plan of the van makes it stand out as you can have a wide open living area with the murphy bed up or put the murphy down and store your camping gear or bikes below. Have dogs? Put their dog kennel below the murphy bed for their own space. The pop-top is another great feature as it expands your living space and you will be able to have a sleeping area out of the main living space.

This van features an abundance of cabinet space and a full galley with an isotherm full size fridge, hot and cold-water faucet, induction cooktop, and filtered drinking water faucet. Stay warm on cold nights with the Aquahot 125 diesel and electric system with two air heaters installed in the front and back of the van. Turn on the hot water heater to take a hot shower with custom privacy curtains at the rear of the van.

With 300 AH of battery power that can be charged by the second alternator or 320w of solar, you will be able to stay off the grid for an extended amount of time. Charge all your devices with a 3000w Victron inverter with three AC plugs throughout the van and be able to charge your van system with the 110v four pin shore power connector. Monitor your entire electronic system through the Victron GX Touch screen.
